SUBJECT INDEX

Abrasion
abrasion of high temperature conveyor belt compounds based on ethylene propylene diene and bromobutyl rubber blends, 167
Aluminium
erosion behavior of prestrained and aged 2024 aluminum, 239
Asperities
a finite element analysis of flattening of surface asperities by perfectly lubricated rigid dies in metal working processes, 109
Auger electron spectroscopy
the analysis of the chemical structure and properties of ceramic surface films in friction using scanning electron microscopy, Auger electron spectroscopy and microregion X-ray diffraction, 277

Bearing materials
a study of the lubricated wear of plain bearing materials in a ZDDP-containing lubricant, 201
Bearings
a study of the lubricated wear of plain bearing materials in a ZDDP-containing lubricant, 201
misalignment effects on hydrodynamically lubricated journal bearings with rough surfaces, 225
Boundary lubrication
mechanical properties of the boundary lubrication layer, 19
Brittle materials
effect of erodent hardness on erosion of brittle materials, 139
Bromobutyl rubber
abrasion of high temperature conveyor belt compounds based on ethylene propylene diene and bromobutyl rubber blends, 167

Cavitation erosion
effects of hard chromium plating on cavitation erosion, 189
Ceramics
the analysis of the chemical structure and properties of ceramic surface films in friction using scanning electron microscopy, Auger electron spectroscopy and microregion X-ray diffraction, 277
the analysis of the friction and wear mechanisms of plasma-sprayed ceramic coatings at 450 °C, 265
Chromium
effects of hard chromium plating on cavitation erosion, 189
Coatings
the analysis of the friction and wear mechanisms of plasma-sprayed ceramic coatings at 450 °C, 265
Condition monitoring
an on-line ferromagnetic wear debris sensor for machinery condition monitoring and failure detection, 325
Connectors
application of radioactivation analysis to the tribological study of gold-plated connectors, 153
Conveyor belts
abrasion of high temperature conveyor belt compounds based on ethylene propylene diene and bromobutyl rubber blends, 167
Corrosion
erosion–corrosion of nickel, 93
Corrugation
an investigation of rail corrugation using friction-induced vibration theory, 99

Elastohydrodynamic lubrication
a non-newtonian effect of sliding in micro-EHL, 249
Elastomers
electron beam damage in scanning electron microscopy of worn elastomer surfaces, 339
Electron beams
electron beam damage in scanning electron microscopy of worn elastomer surfaces, 339

© Elsevier Sequoia/Printed in The Netherlands

Erosion
effect of erodent hardness on erosion of brittle materials, 139
effects of hard chromium plating on cavitation erosion, 189
erosion behavior of prestrained and aged 2024 aluminum, 239
erosion–corrosion of nickel, 93
Errors
assessment of errors in geometrical relationships, 179
Ethylene propylene diene
abrasion of high temperature conveyor belt compounds based on ethylene propylene diene and bromobutyl rubber blends, 167

Failure detection
an on-line ferromagnetic wear debris sensor for machinery condition monitoring and failure detection, 325
Finite element analysis
a finite element analysis of flattening of surface asperities by perfectly lubricated rigid dies in metal working processes, 109
Friction
an investigation of rail corrugation using friction-induced vibration theory, 99
the analysis of the chemical structure and properties of ceramic surface films in friction using scanning electron microscopy, Auger electron spectroscopy and microregion X-ray diffraction, 277
the analysis of the friction and wear mechanisms of plasma-sprayed ceramic coatings at 450 °C, 265

Geometrical relationships
assessment of errors in geometrical relationships, 179
Gold
application of radioactivation analysis to the tribological study of gold-plated connectors, 153
Grinding
running-in wear of white layers formed on EN24 steel by centreless grinding, 83

Hardness
effect of erodent hardness on erosion of brittle materials, 139
Hydrodynamic lubrication
misalignment effects on hydrodynamically lubricated journal bearings with rough surfaces, 225

Journal bearings
misalignment effects on hydrodynamically lubricated journal bearings with rough surfaces, 225

Lubricants
a study of the lubricated wear of plain bearing materials in a ZDDP-containing lubricant, 201
Lubrication
a finite element analysis of flattening of surface asperities by perfectly lubricated rigid dies in metal working processes, 109
a mechano-chemical descriptive model for wear under mixed lubrication conditions, 307
a study of the lubricated wear of plain bearing materials in a ZDDP-containing lubricant, 201
mechanical properties of the boundary lubrication layer, 19

Mechanical properties
mechanical properties of the boundary lubrication layer, 19
Metal cutting
metal cutting and the tribology of seizure: I seizure in metal cutting, 29
metal cutting and the tribology of seizure: II movement of work material over the tool in metal cutting, 47
metal cutting and the tribology of seizure: III temperatures in metal cutting, 65
Metal working
a finite element analysis of flattening of surface asperities by perfectly lubricated rigid dies in metal working processes, 109
Metals
wear properties of metal-evaporated video tape, 291
Mild wear
the effect of oxide particles supplied at the interface before sliding on the severe–mild wear transition, 123

Misalignment
misalignment effects on hydrodynamically lubricated journal bearings with rough surfaces, 225

Nickel
erosion–corrosion of nickel, 93
Non-newtonian effects
a non-newtonian effect of sliding in micro-EHL, 249

Oxides
the effect of oxide particles supplied at the interface before sliding on the severe–mild wear transition, 123

Particles
the effect of oxide particles supplied at the interface before sliding on the severe–mild wear transition, 123
Plasma spraying
the analysis of the friction and wear mechanisms of plasma-sprayed ceramic coatings at 450 °C, 265
Plating
effects of hard chromium plating on cavitation erosion, 189

Radioactivation analysis
application of radioactivation analysis to the tribological study of gold-plated connectors, 153
Rails
an investigation of rail corrugation using friction-induced vibration theory, 99
Rough surfaces
misalignment effects on hydrodynamically lubricated journal bearings with rough surfaces, 225
Rubber
abrasion of high temperature conveyor belt compounds based on ethylene propylene diene and bromobutyl rubber blends, 167
Rubbing
the temperature of rubbing bodies; Part 2, the distribution of temperatures, 1
Running-in
running-in wear of white layers formed on EN24 steel by centreless grinding, 83

Scanning electron microscopy
electron beam damage in scanning electron microscopy of worn elastomer surfaces, 339
the analysis of the chemical structure and properties of ceramic surface films in friction using scanning electron microscopy, Auger electron spectroscopy and microregion X-ray diffraction, 277
Seizure
metal cutting and the tribology of seizure: I seizure in metal cutting, 29
metal cutting and the tribology of seizure: II movement of work material over the tool in metal cutting, 47
metal cutting and the tribology of seizure: III temperatures in metal cutting, 65
Severe wear
the effect of oxide particles supplied at the interface before sliding on the severe–mild wear transition, 123
Sliding
a non-newtonian effect of sliding in micro-EHL, 249
the effect of oxide particles supplied at the interface before sliding on the severe–mild wear transition, 123
Steels
running-in wear of white layers formed on EN24 steel by centreless grinding, 83
Surfaces
a finite element analysis of flattening of surface asperities by perfectly lubricated rigid dies in metal working processes, 109
electron beam damage in scanning electron microscopy of worn elastomer surfaces, 339
misalignment effects on hydrodynamically lubricated journal bearings with rough surfaces, 225
the analysis of the chemical structure and properties of ceramic surface films in friction using scanning electron microscopy, Auger electron spectroscopy and microregion X-ray diffraction, 277

Tools
metal cutting and the tribology of seizure: II movement of work material over the tool in metal cutting, 47
Tribology
application of radioactivation analysis to the tribological study of gold-plated connectors, 153
metal cutting and the tribology of seizure: I seizure in metal cutting, 29
metal cutting and the tribology of seizure: II movement of work material over the tool in metal cutting, 47
metal cutting and the tribology of seizure: III temperatures in metal cutting, 65

Vibration
an investigation of rail corrugation using friction-induced vibration theory, 99
Video tape
wear properties of metal-evaporated video tape, 291

Wear
a mechano-chemical descriptive model for wear under mixed lubrication conditions, 307
a study of the lubricated wear of plain bearing materials in a ZDDP-containing lubricant, 201
an on-line ferromagnetic wear debris sensor for machinery condition monitoring and failure detection, 325
electron beam damage in scanning electron microscopy of worn elastomer surfaces, 339
running-in wear of white layers formed on EN24 steel by centreless grinding, 83
the analysis of the friction and wear mechanisms of plasma-sprayed ceramic coatings at 450 °C, 265
the effect of oxide particles supplied at the interface before sliding on the severe–mild wear transition, 123
wear properties of metal-evaporated video tape, 291
Wear debris
an on-line ferromagnetic wear debris sensor for machinery condition monitoring and failure detection, 325

X-ray diffraction
the analysis of the chemical structure and properties of ceramic surface films in friction using scanning electron microscopy, Auger electron spectroscopy and microregion X-ray diffraction, 277
